Overview

HR Business Cloud(HRBC) Version 3.12.25 has the following changes.

1 Merging Client and Recruiter Information

From this version, it will be possible to merge Client and Recruiter information. This function can be used in cases of duplicate data in Client and Recruiter.

Issues

- Improvement of interaction between items on bulk action list page and "Stop Button".
- Improvement of interaction when focusing on the input box.
- Fixed the issue of the layout of the valid flag for the automatic matching sublist collapsing.
- Fixed the issue of the layout changing when "Participant" item in the Activity detailed screen is changed to a 2 columns group.
- Fixed the issue of search button and input field layout distortion on the merge dialogue box.
- Fixed the issue of date input assistance box not being displayed well on Internet Explorer.
- Added an error screen that is displayed when a search on attachment hits more than 10,000 results.

※The contents of this document are current as per the time of publication.
   However, minor changes may be made.

Details

1 Improved mail notification function when data is updated

Summary

After the introduction of Resume merge in the last release, we have now introduced a function to merge duplicate Recruiter and Client information to respond to the rising needs from HRBC users.

Merge funtion for both Client and Recruiter can be done from the list view and detailed view screen of Client.

Below is the guide on how to perform the merge function:

※For detailed information on how to perform merge funtion, please refer to the help page after new version release by clicking the「Help」icon at the top right of the HRBC screen.
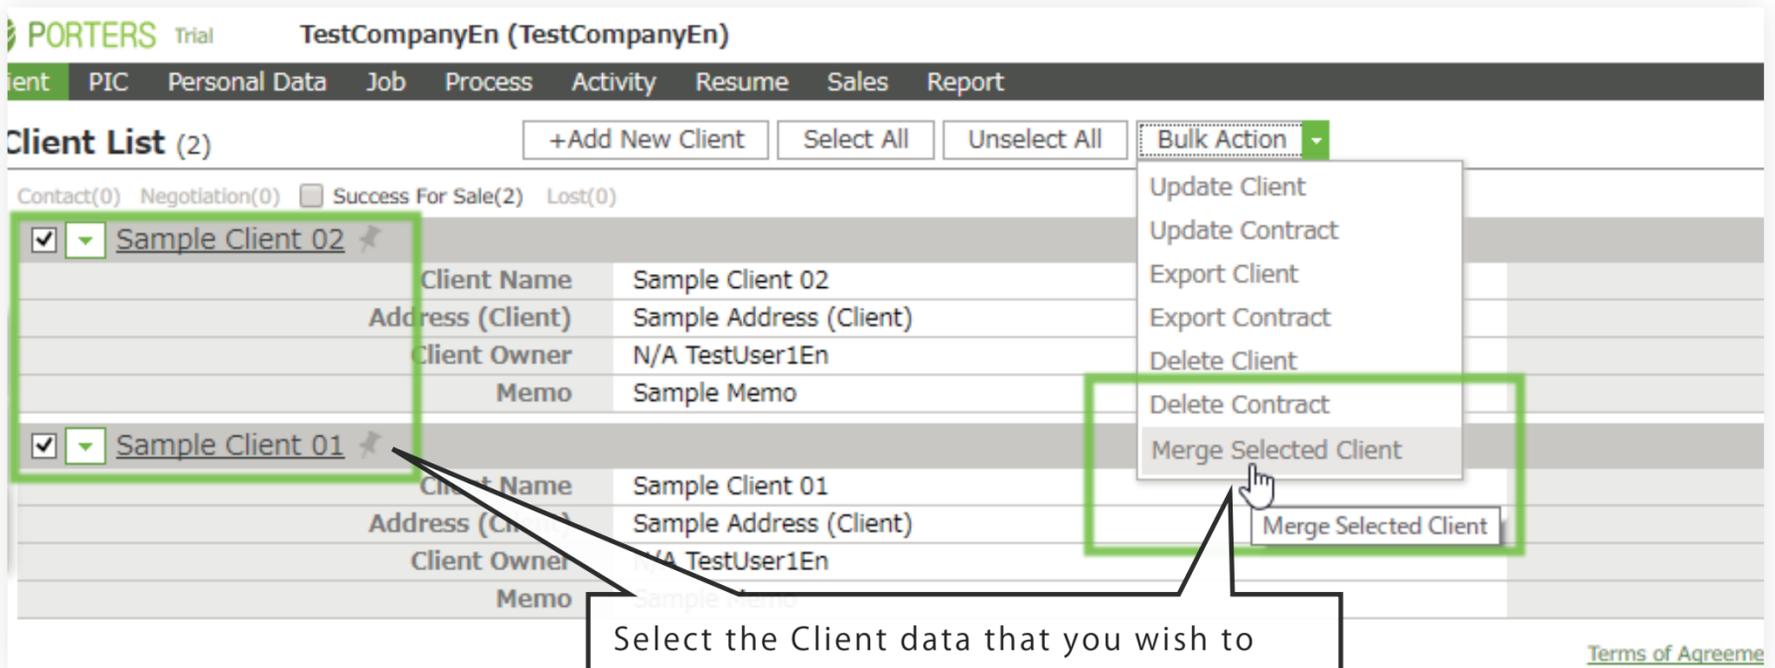

Select the Client data that you wish to merge from the Client list view and select the merge option from Bulk Action.
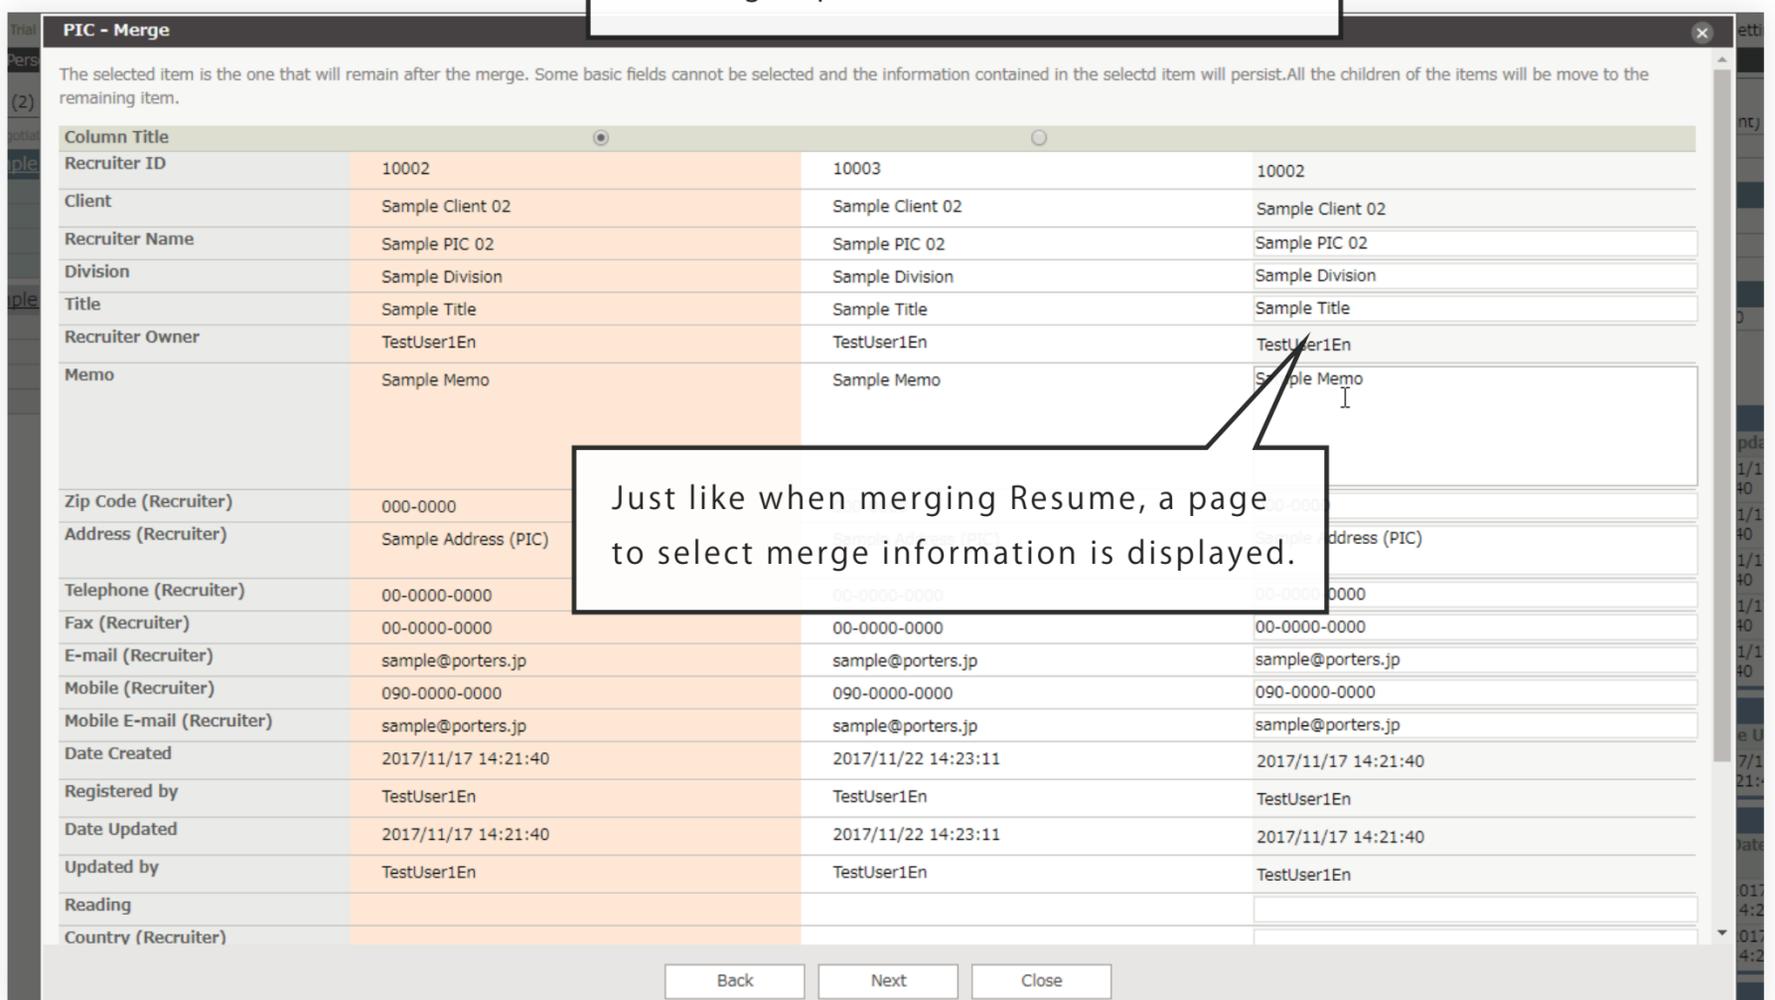

Just like when merging Resume, a page to select merge information is displayed.

Once you click 'Merge', the merge process begins. An icon to show the process is displayed at the top right side of the screen and the results can be confirmed by clicking on the icon after the process is completed.

Recruiter data merging can be done from the Client's sublist.
