

version

# 4.0.4

—Release Note—

## Overview

HR Business Cloud(HRBC) Version 4.0.4 has the following changes.

1. Fixed the issue of the most advanced process not being displayed at the top on the Sublist Process if there are more than 1000 ongoing processes.
2. Fixed the issue of the preset criteria on the report getting deleted when [Save] button on the report edit page is clicked continuously.
3. Fixed the issue of the fixed value input date and time items on an existing report getting updated when values other than the fixed value input date and time items are updated.

※The contents of this document are current as per the time of publication.  
However, minor changes may be made.
