

version

3.12.28

—Release Note—

Overview

HR Business Cloud(HRBC) Version 3.12.28 has the following changes.

1 Renewal of HRBC Apps Page

The HRBC Apps page has a new design from this version onwards. The display order of the items and interaction have also change to make it much easier to use.

Issues

- Fixed the issue of 500 on the currency item of imported data appearing as 500.0 on the smart document.
- Fixed the issue of some condition getting deleted from the search results screen when using the refine search function of Resume search on matching.
- Fixed the issue of contents in 「Comment」 protruding out of the setting screen when the length of comment box increases.
- Fixed the issue of menu names of saved searches going back to default settings when a new user is added.
- Fixed the issue of irregular display of error message when the results of inter-field calculation are Read Only.
- Fixed the issue of tags not being replaced by the data when creating PDF.
- Fixed the issue of mail item domain not being displayed in the error message when there is an error.
- Changed the error message that appears in number items when the minimum value input exceeds the maximum value input.
- Now it is possible to select 'All day' for period when Fixed value input is selected in date items.
- Fixed the issue of pull down menu not being displayed when radio button is set in option's the second hierarchy.
- Fixed the issue of note below the text box which shows how many characters are remaining not displaying well when scrolling.
- Fixed the issue of irregular display of the detail screen when an image with a wide length is uploaded.
- Fixed the issue of display of inaccurate search results of 「Date created」 when date created is referenced on another item.
- Fixed the issue of Edit Options Screen layout getting distorted.
- Fixed the issue of the error message 「You do not have access to perform this function」 being displayed to users with selected security settings even though they have access to the functions.
- Fixed the issue of data not being displayed due to error graph error when creating a report with extraction condition as Number.
- Fixed the issue of error message not being displayed on one page when two pages of Process sublist are opened simultaneously and activity data is deleted from one sublist page .
- Fixed the issue of data being able to be saved in Phase Edit screen when the title is left blank.

※The contents of this document are current as per the time of publication.
However, minor changes may be made.

Details

1 Renewal of HRBC Apps Page

Summary

Following the reconsideration of usability, we have renewed the application list screen of HRBC Apps, created the display, contents and order of each application with a new design and new rules. In the new application list screen, the applications that are currently being used appear at the top and English explanations are included.

The screenshot shows the HRBC Apps interface with four application cards. Callouts provide the following information:

- Opens in a new tab.** (Points to the top-left card)
- Applications that are currently being used appear at the top of the page.** (Points to the top row of cards)
- Each application has a logo.** (Points to the logo on the bottom-right card)

The application cards are:

- webparts**: Provider: PORTERS Corporation, 30,000JPY/Month. Description: Web Partsを使用すると、HRビジネスクラウドに登録済みの求人情報や、求職者がエントリーするためのフォームを表示するためのHTMLタグを生成することができます。このタグをWebサイトに張り付けることによって、HRビジネスクラウドと連動した求人サイトを作成することができます。 Stared from 2018/02/08. Includes a 'Cancel Subscription' button.
- Web Parts Light**: Provider: PORTERS Corporation, Free. Description: Web Parts Lightを使用すると、求職者がエントリーするためのフォームを表示するHTMLタグを自動生成することができます。このタグをWebサイトに張り付けることによって、HRビジネスクラウドと連動した求職者エントリーページを作成することができます。 Under maintenance. 2017/09/21 0:00~2017/10/20 0:00. Stared from 2018/02/08.
- スマート帳票 / Smart Document**: Provider: Intelligence, Free. Description: スマート帳票を使用すると野帳やロゴの入ったリッチな帳票を作成することができます。標準の求人票・キャリアシート・求人管理簿・求職管理簿・請求書の5つの無償テンプレートをご利用いただくことが可能です。*標準テンプレートのカスタマイズや、オリジナルの帳票作成は別途開発費がかかります。 Includes a 'Go to Subscribe screen' button.
- RANシステム連携アプリ**: Provider: PORTERS Corporation, Free. Description: HRビジネスクラウドとリクナビNEXTエージェントネットワーク(通称: RAN-System)との間で自動的にデータ連携を行うことができます。RANシステムのご利用は別途株式会社リクルートキャリアへの申請が必要となります。 Under maintenance. 2017/09/21 0:00~2017/10/20 0:00.
