

version  
**3.12.24**  
—Release Note—

## Overview

HR Business Cloud(HRBC) Version 3.12.24 has the following changes.

### **1** Improved mail notification function when data is updated

When data in the detailed page of a resource is updated, the name of the resource owner can be confirmed on the notification function. Additionally, the recipient of the notification and subject of the notice can be changed as necessary.

## Other

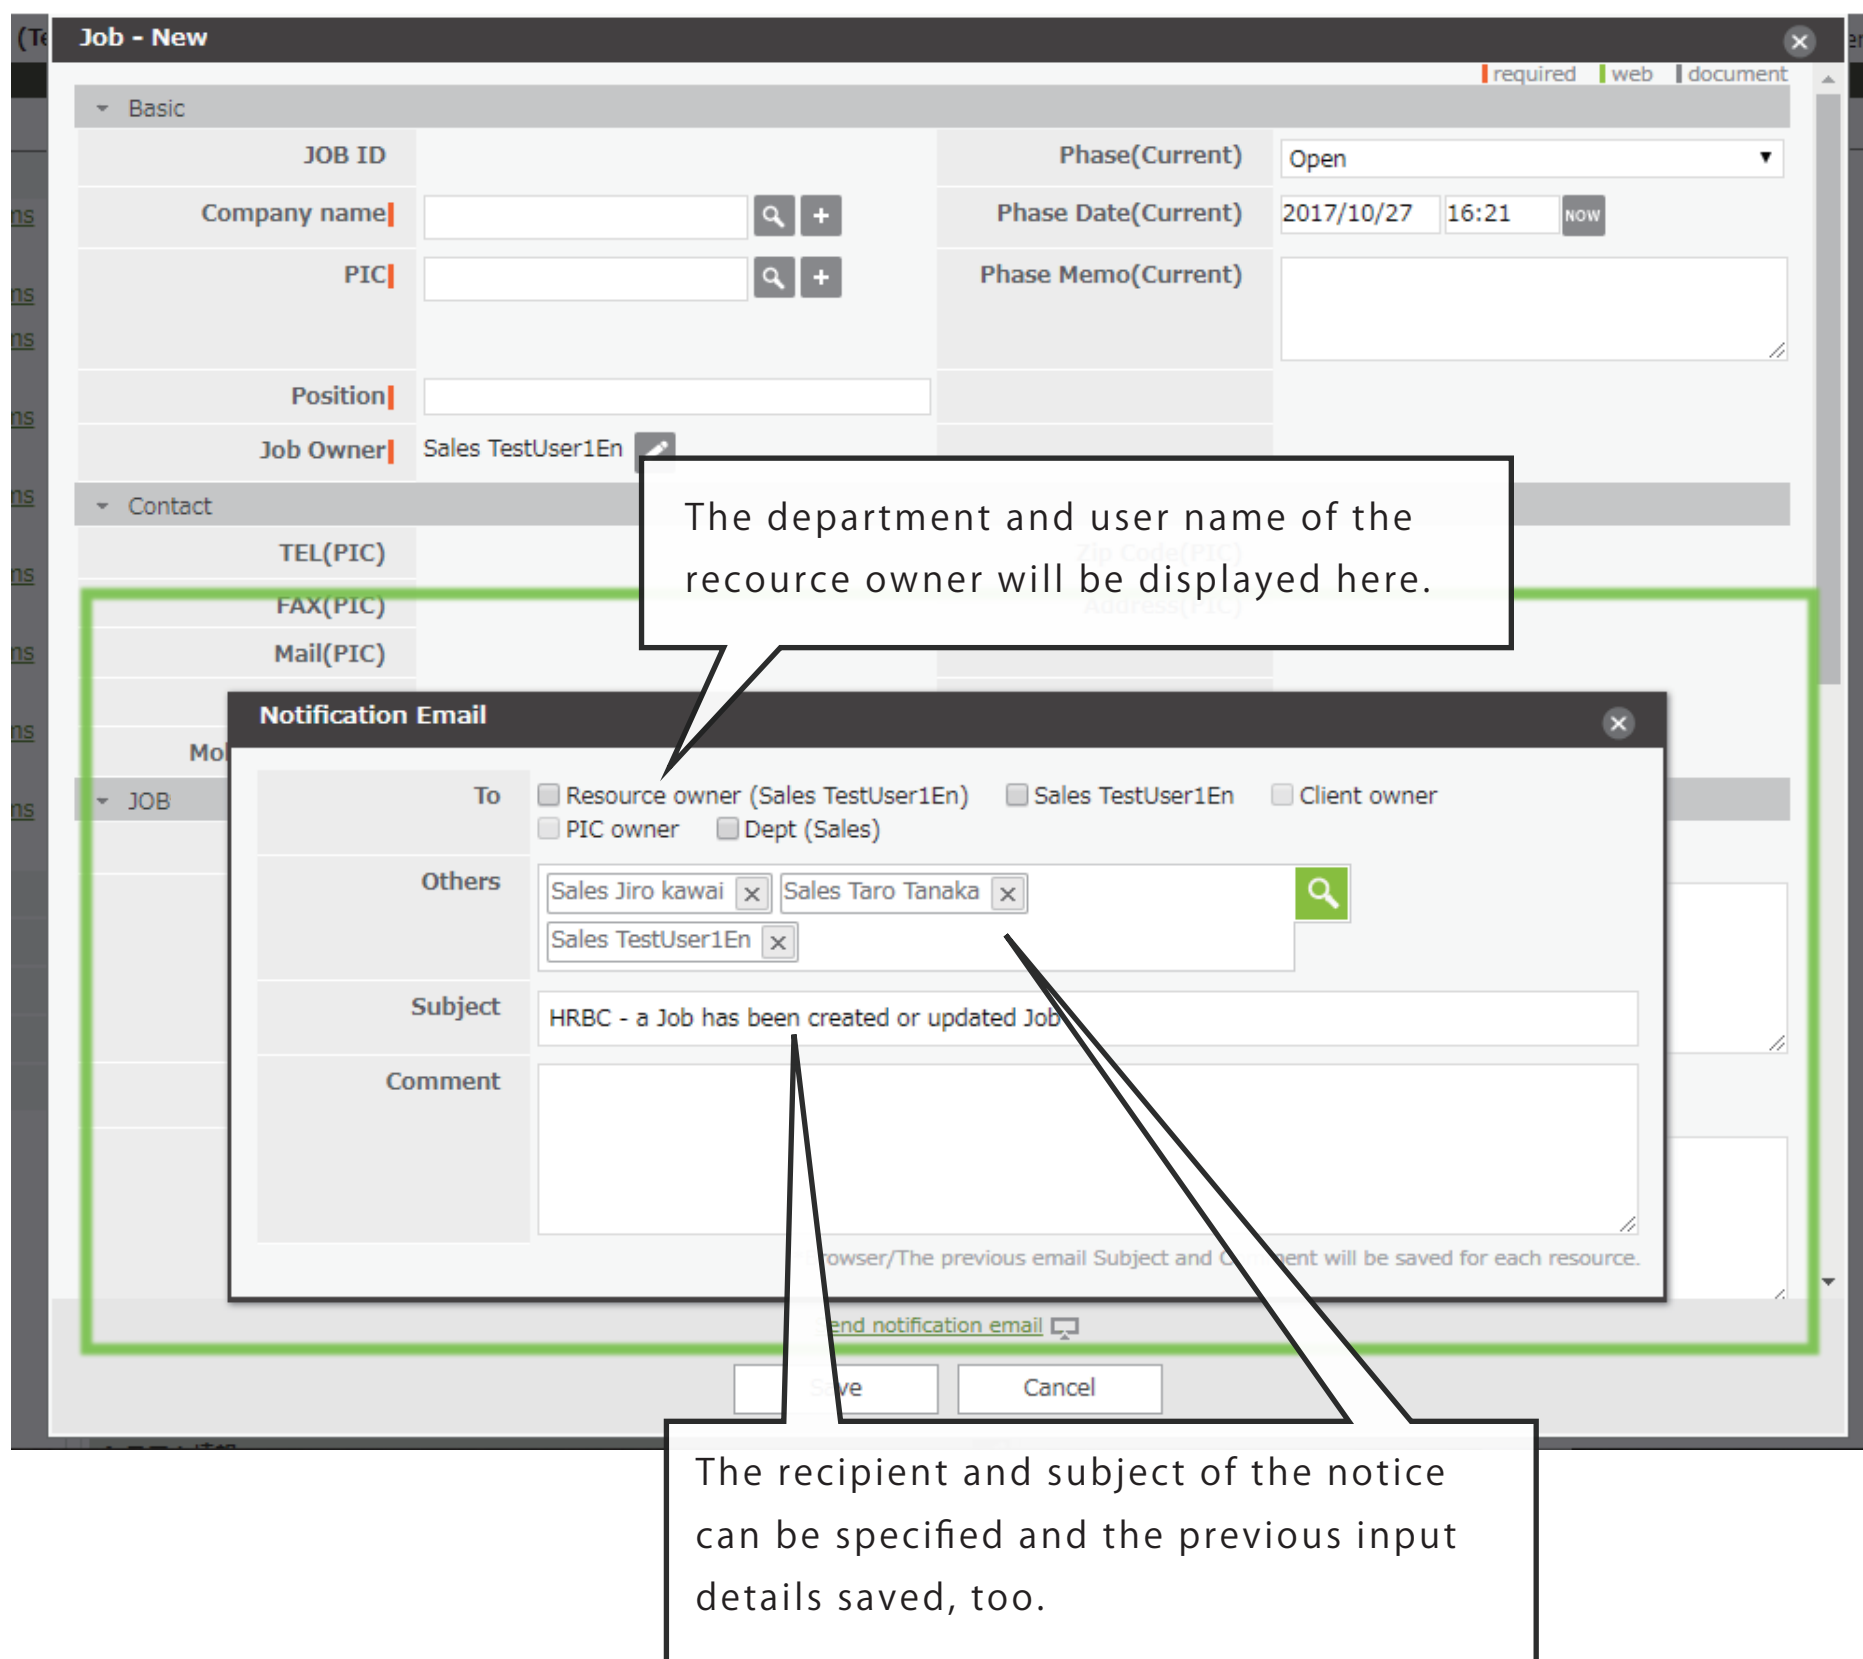

- From this version, the application function name will change from 「Apps」 to 「HRBC Apps」 . Along with that, some wordings such as in menu names and parts of the page content have been changed too.

# Details

## 1 Improved mail notification function when data is updated

### Summary

The mail notification function to notify relevant members of changes made to Resume or Job has been made much simpler. Not only can the name of the resource owner be displayed but also the recipient of the notification and the subject of the notice can be changed as necessary.
