

version

3.12.20

—release note—

Overview

HR Business Cloud(HRBC) Version 3.12.20 has the following changes.

1 Search function of reference type item.

System Administrators Settings required in part

To make good use of searching resources on other hierarchies, all reference type item will be possible to search. For example, search resumes by input candidates' mobile numbers or mail addresses.

2 Synchronized word and language of 「saved search」 with main menu.

The 「XXX」 part of 「All XXX」 or 「My XXX」 on saved search menu will be the same to main menu from this version. If the main menu changed, the word in saved search menu will also change.

3 Chang of sublist ordering rule.

From this version, for particular sublists, the ordering rule is changed.

For example, the main order of sales sublist changed from 「updated date」 to 「joining date」.

4 Bug fix

- Added a button to open 「bulk task」 in a new window.
- Fixed an issue of error occurred when sending mail with a zipped file which included 「/」 in its filename.
- Fixed an issue that icon becomes two on resource list after add a new record include of reference option type item.
- Fixed an issue of phase' s checkbox on the top of resource list , which disappear when the number of records become 999.

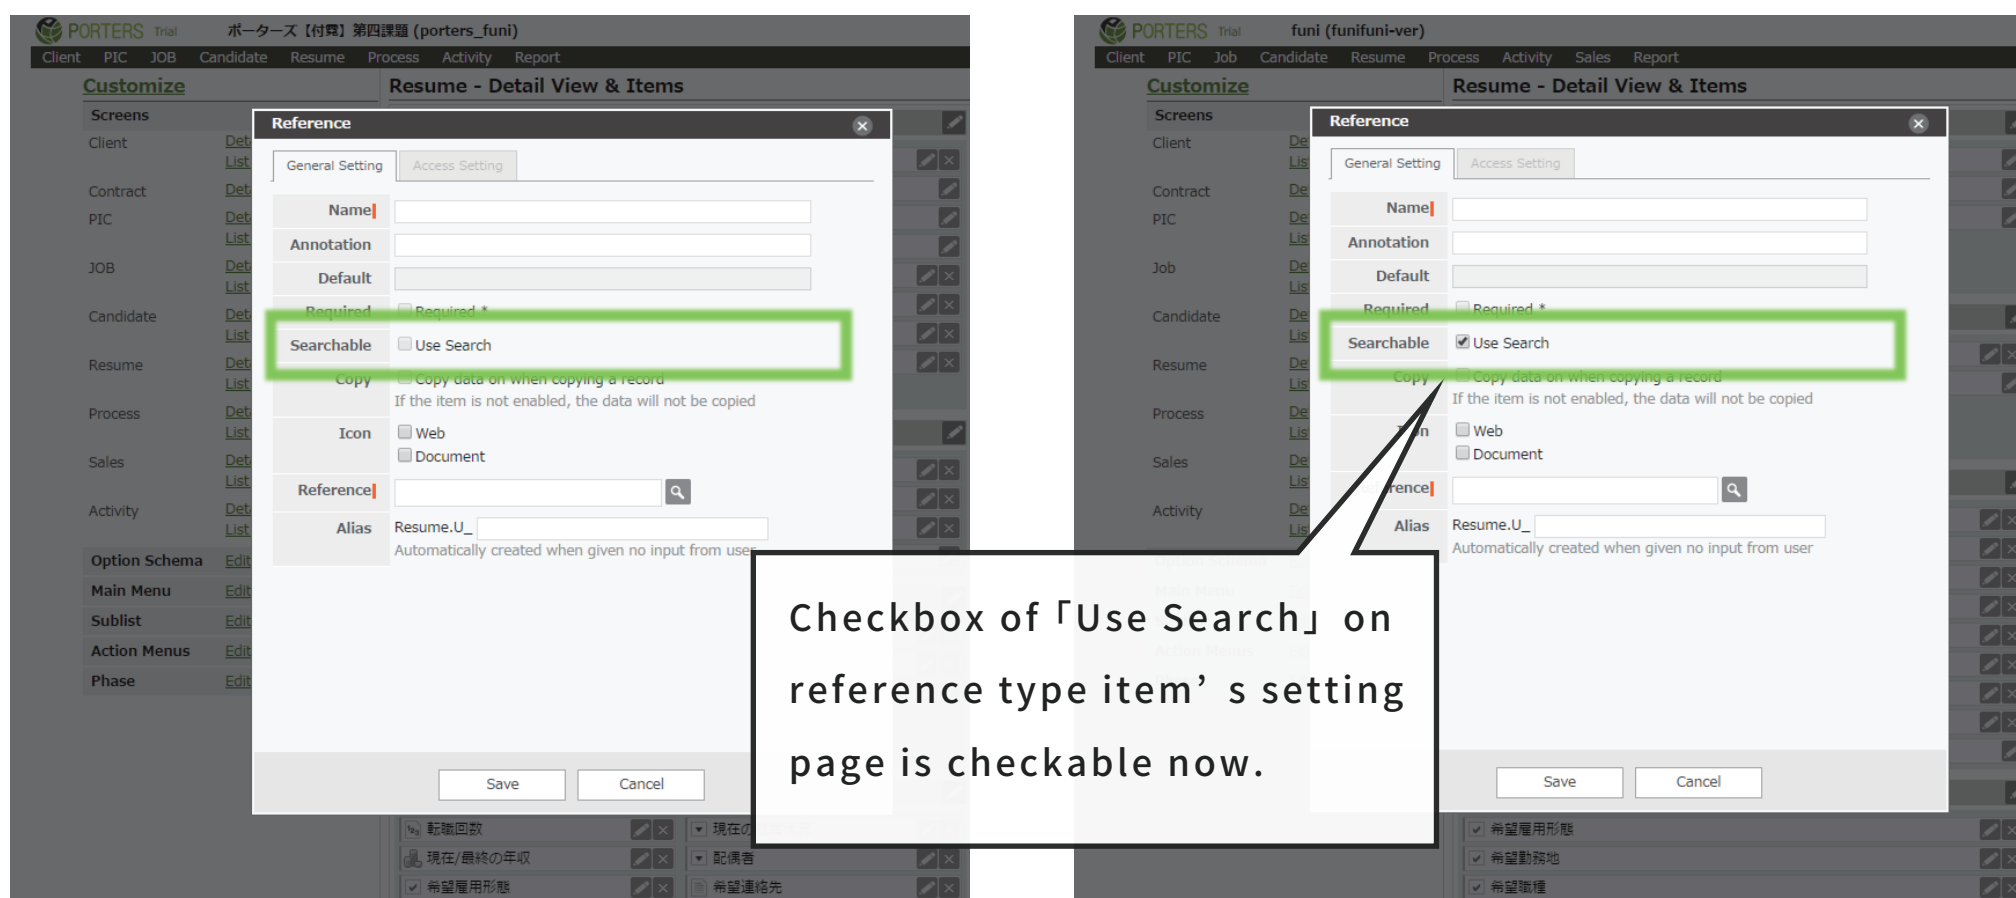

Details

1 Search function of reference type item

System Administrators Settings required in part

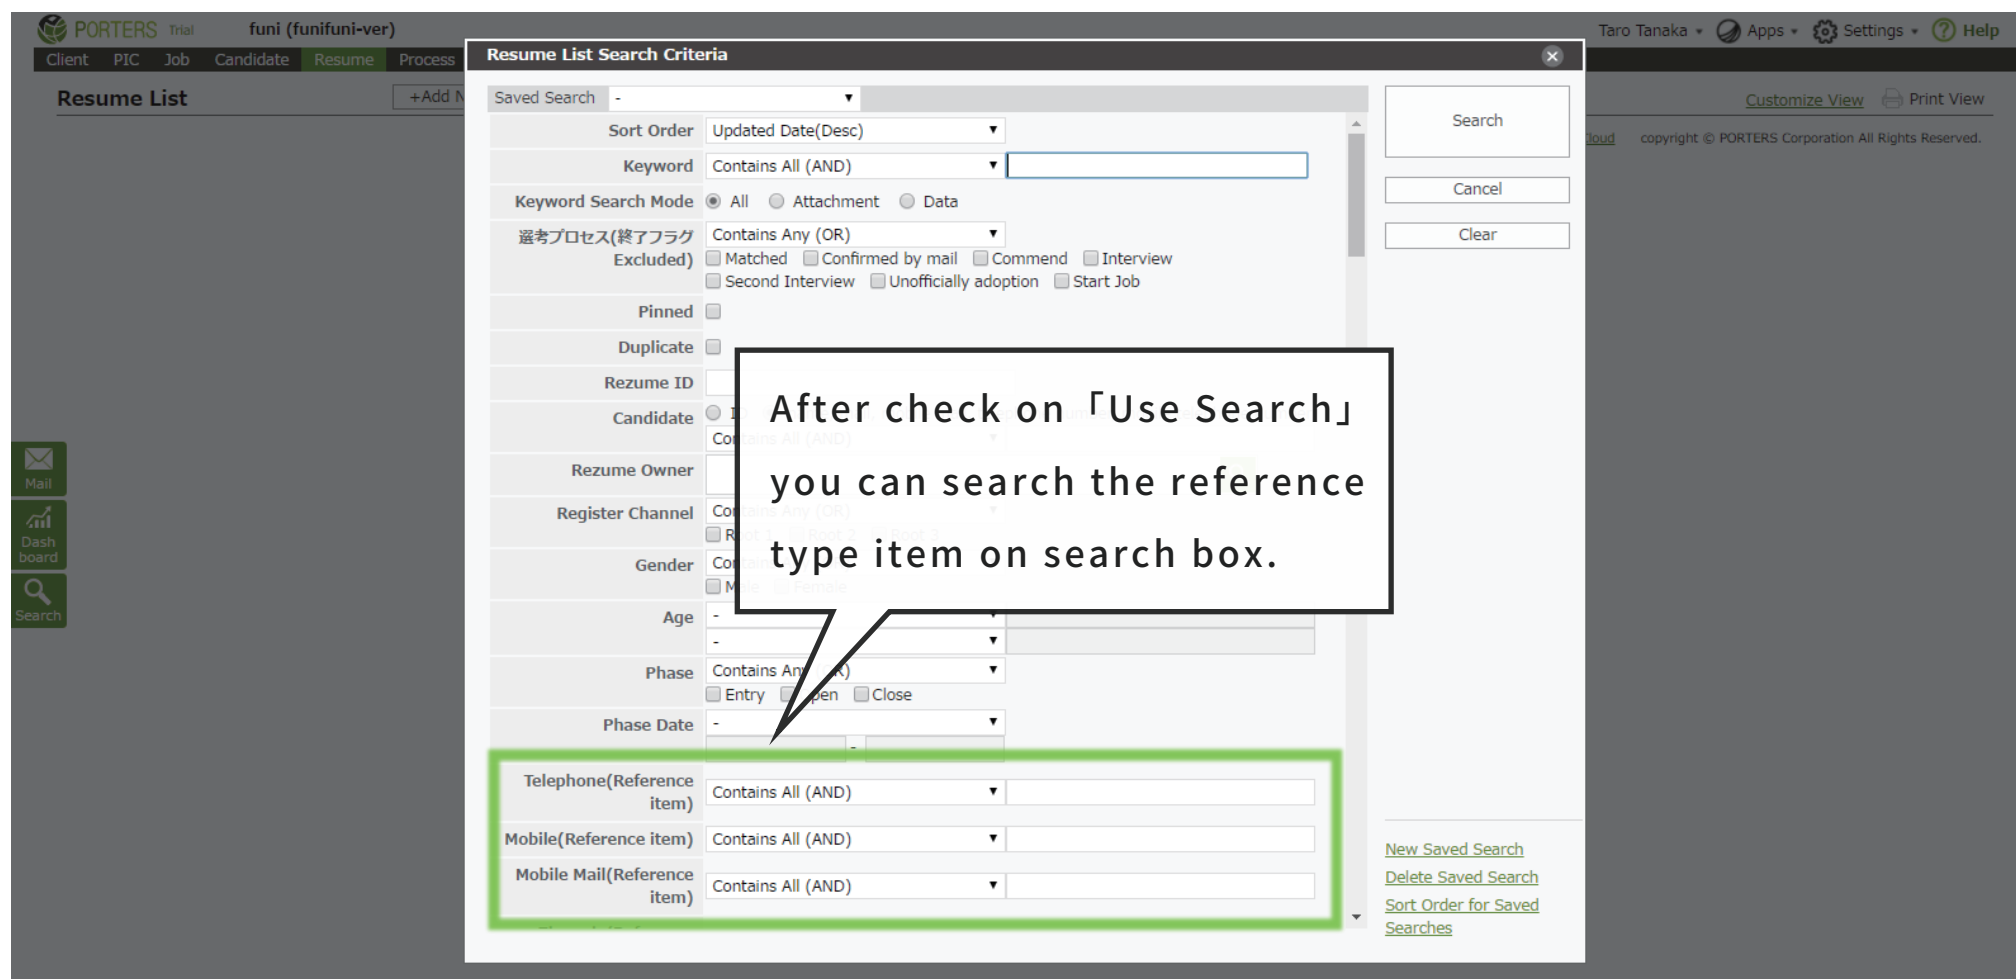

Summary

From this version, all reference type is possible to search. Check 「Use Search」 on customize page would make reference items searchable. (Only System Administrator is possible to do the setting)

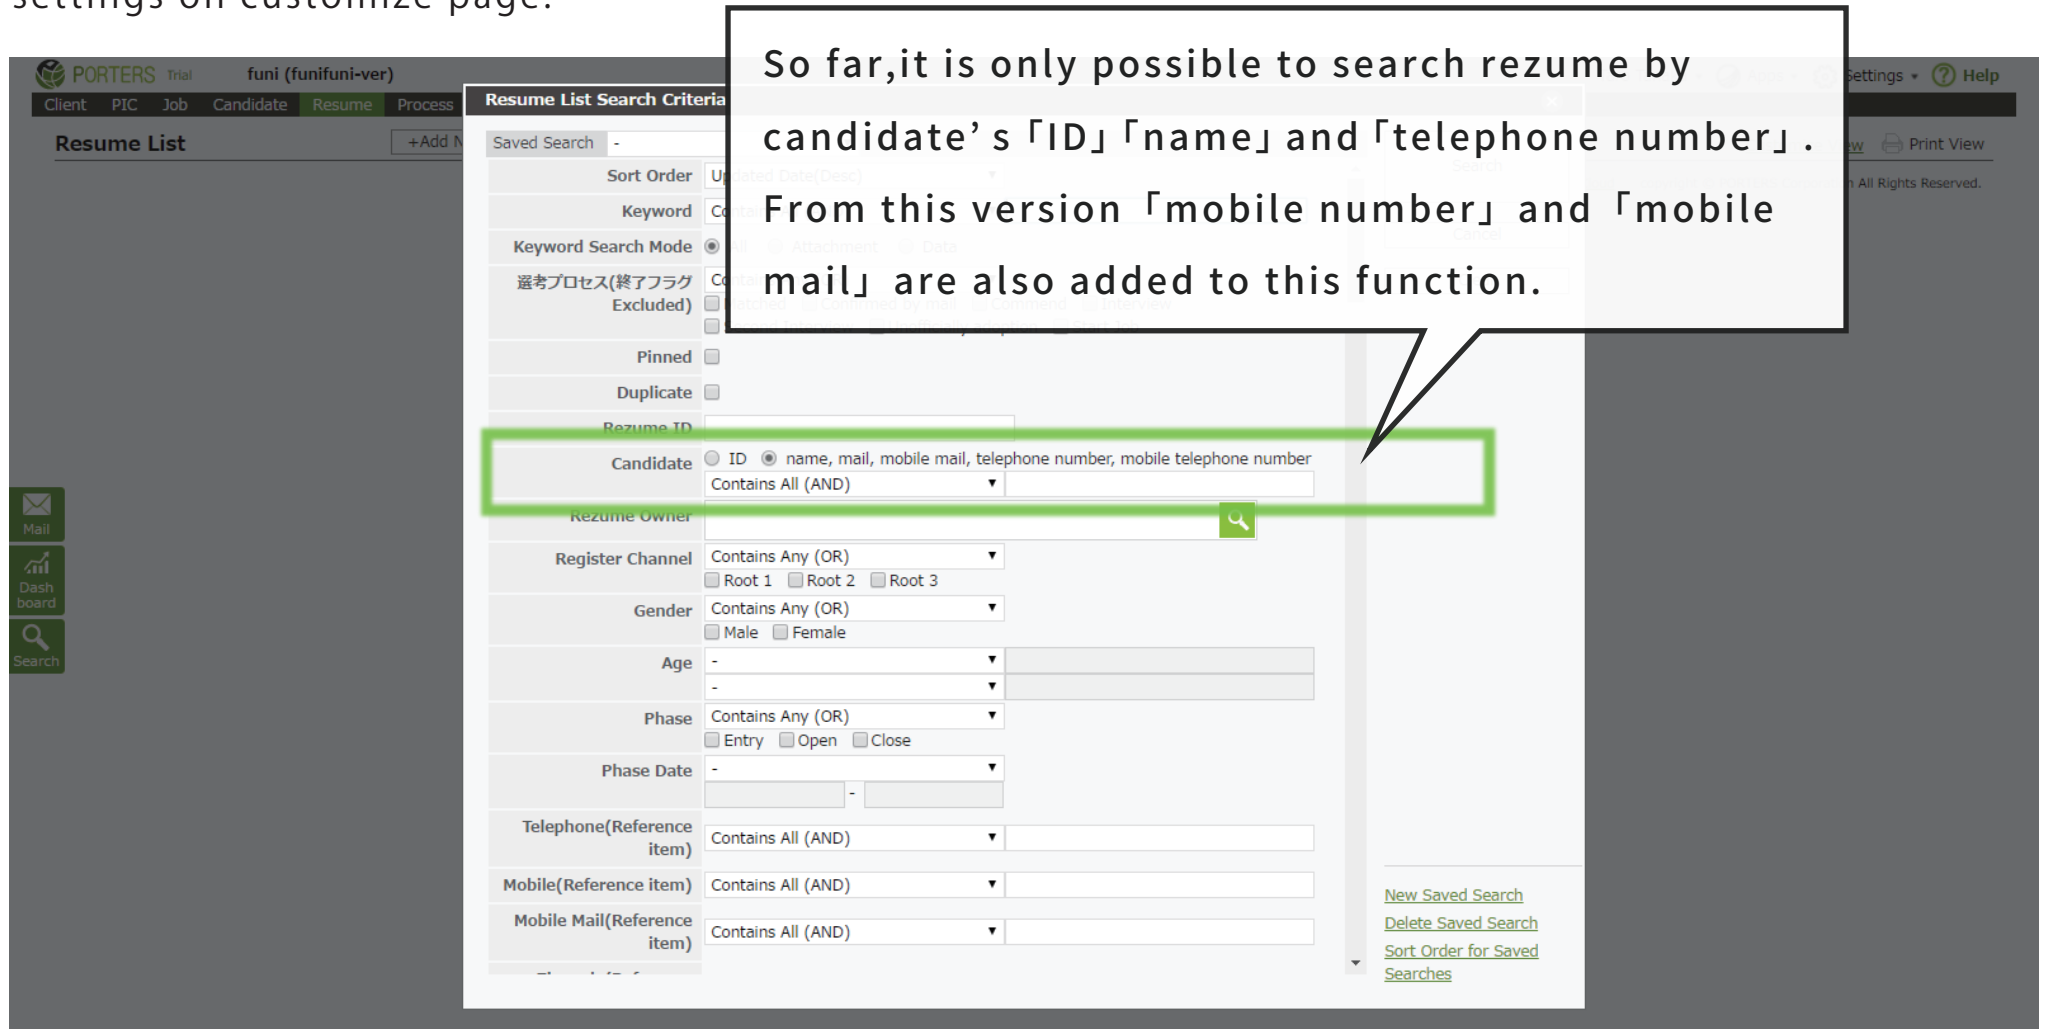

※Previous version

※Version 3.12.20

Also, use candidate's mobile number and etc. to search one's resume is possible without change settings on customize page.

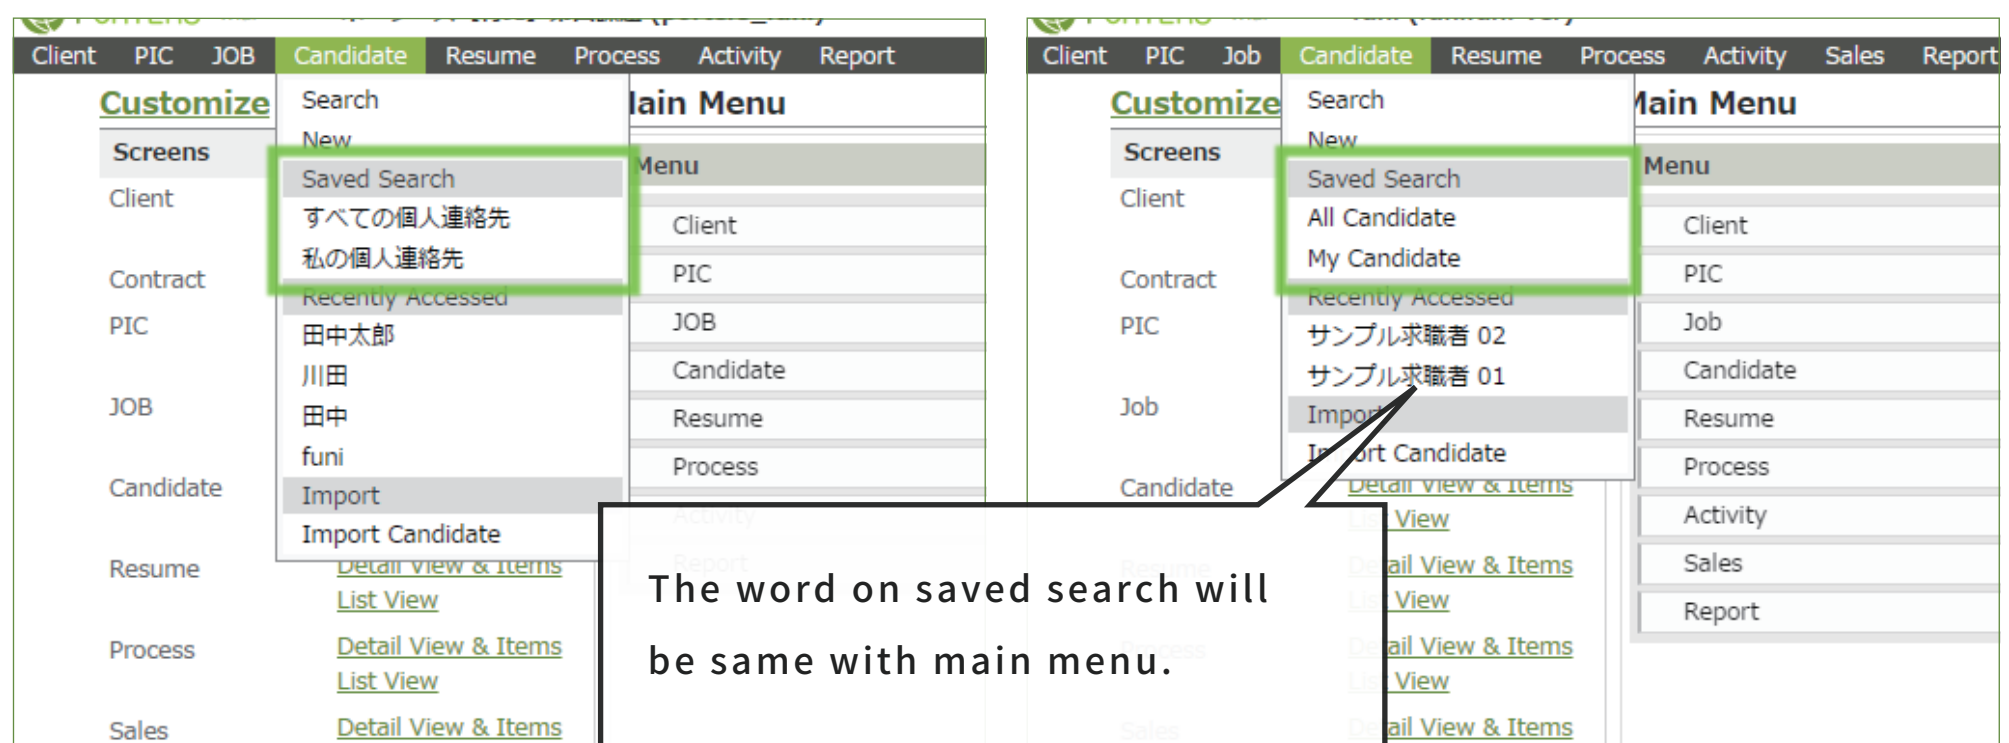

2 Synchronized word and language of 「saved search」 with main menu.

Summary

From this version, words in 「saved search」 menu will be Synchronized with main menu's name. (for example, if you changed the main menu 「Personal Date」 into 「Candidate」, saved search's menu will become 「All Candidate」 「My Candidate」 and etc.)

※All data will be synchronized from this version, it is unnecessary to set up main menu's name again.

※Previous version

※Version 3.12.20

※in rare cases, all words or part of word that user gives to saved search menu overlap with internal use keywords in HRBC. In this case, the overlapped part will replace the keyword of saved search menu.

3 Chang of sublist ordering rule.

Summary

So far, order of rows in sublist is updated date (from new to old).

From this version, we changed kinds of sort to fit user's business flow more into follow rules.

details of orders :

Sublists	Sales	Contract	Rezume	PIC	JOB
Main Order	Joining Date item Alias:Sales.P_EnterDate	Updated date	Updated date	Updated date	Updated date
Sub Order	ID	ID	ID	ID	ID

※Sub order will only be used when the details of main orders is multiplied.

4 Bug fix
