

version

4.0.9

—Release Note—

Overview

HR Business Cloud(HRBC) Version 4.0.9 has the following changes.

1 Display of data in the matching list from external media linked with HRBC.

It is now possible to display in the matching list, JOB and Resume data sent from external media linked with HRBC.

Issues

- Fixed the issue of the data in search box option fields being hidden when an existing recourse of a search box option item is copied.
- Fixed the issue of duplicate registration of 「User Department」 when the save button of 「Department-Edit」 page is double clicked.
- Fixed the issue of [Edit] on the 「Value」 tab of 「Data Conversion Setting」 in Resume import appearing in Japanese even if HRBC default language is set to English.
- Fixed the issue of 「。」 not appearing in error message when a file other than CSV is uploaded on the 「Client - import (1/4)」.

※The contents of this document are current as per the time of publication.
However, minor changes may be made.

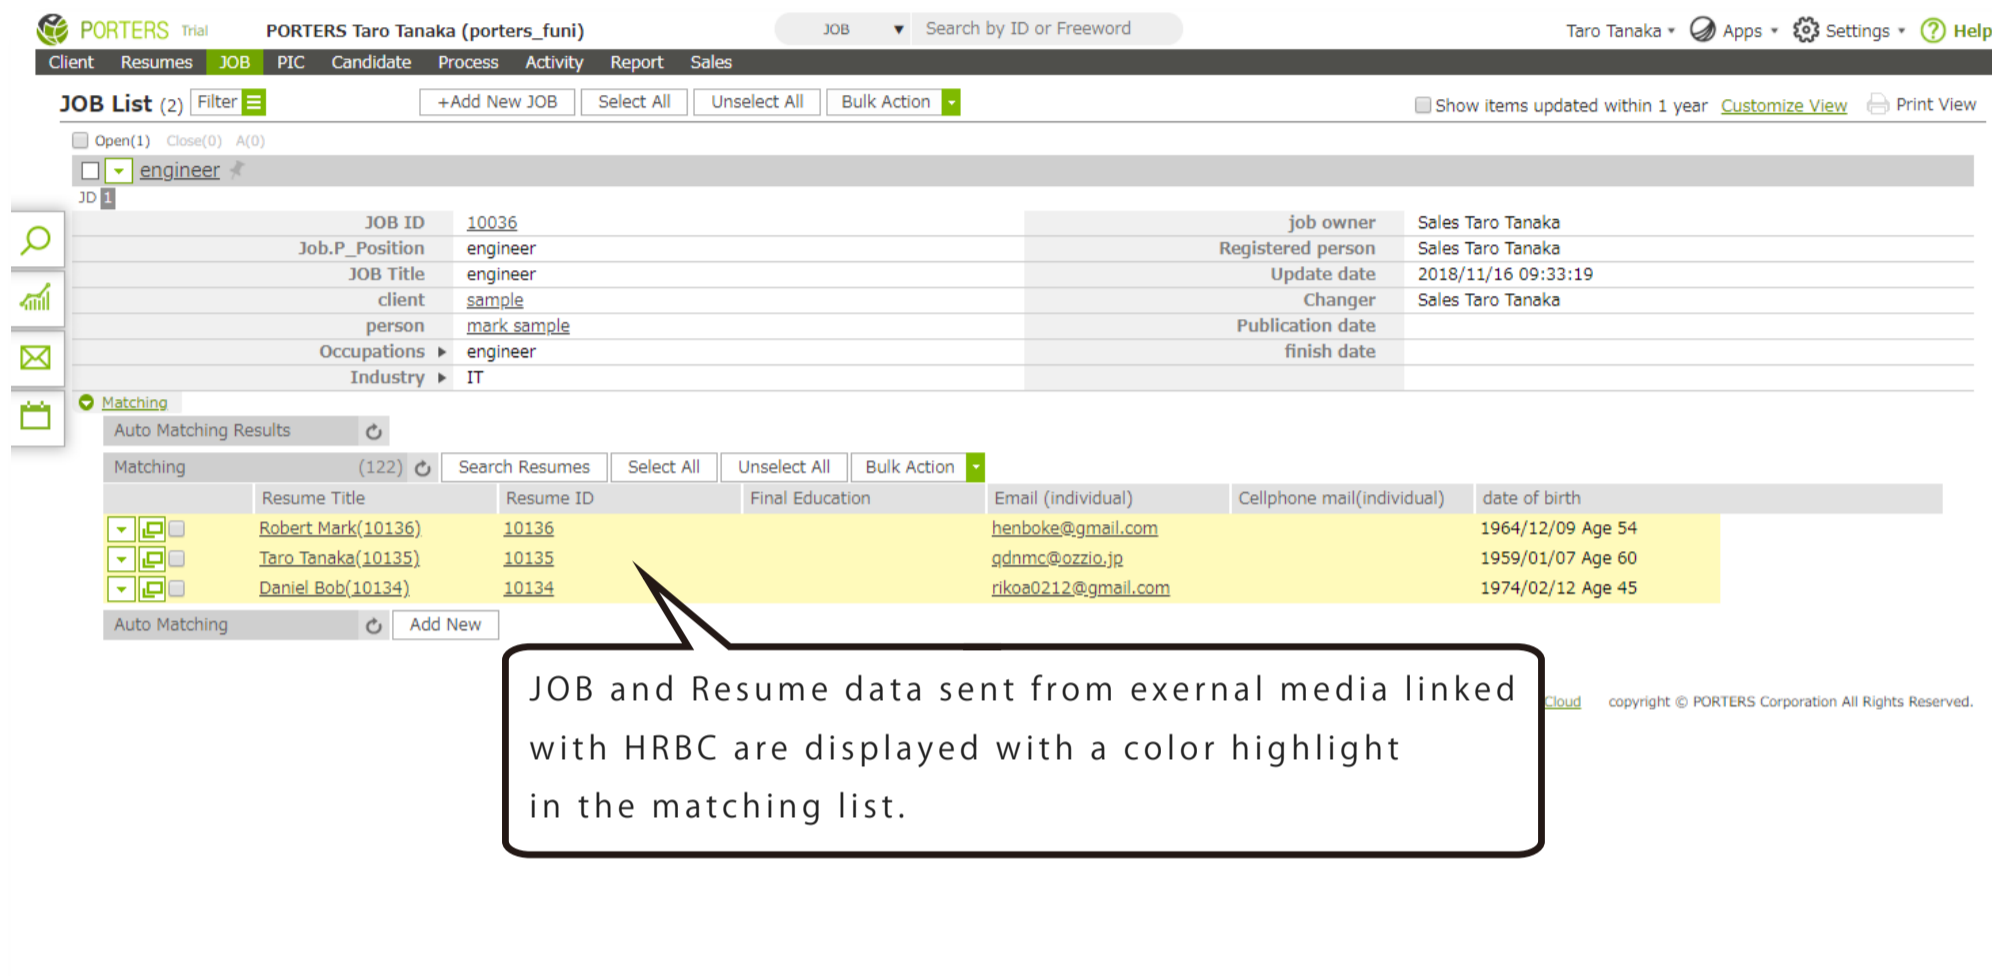

Details

1 Display of data in the matching list from external media linked with HRBC.

Summary

It is now possible to display in the matching list, JOB and Resume data selected in external media linked with HRBC.

On HRBC screen, you can perform the following actions.

The screenshot displays the PORTERS HRBC interface. At the top, there is a navigation bar with 'PORTERS Taro Tanaka (porters_funi)' and a search bar. Below this, a 'JOB List (2)' section shows a table with job details. The 'Matching' section below it shows a table of resume matches. A callout box highlights the matching list with the text: 'JOB and Resume data sent from external media linked with HRBC are displayed with a color highlight in the matching list.'

Resume Title	Resume ID	Final Education	Email (Individual)	Cellphone mail(Individual)	date of birth
Robert Mark(10136)	10136		henboke@gmail.com		1964/12/09 Age 54
Taro Tanaka(10135)	10135		gdnmc@ozzie.jp		1959/01/07 Age 60
Daniel Bob(10134)	10134		rikoa0212@gmail.com		1974/02/12 Age 45

※The external media linked with HRBC as of the release of ver4.0.9 (May 14th 2019) onwards will be applicable.
