· Fixed the display of the input box on the login page.
· Fixed the display of the selection box in the 'New' and 'Edit' page.

※The contents of this document are current as per the time of publication.
   However, minor changes may be made.

Details

1 Security Settings for Password

Summary

To strengthen password security, from this version onwards it will be possible for the System Administrator user to set requirements for setting a password. There are 5 items that can be set in the requirements: Password length, password complexity requirements, account lock, record of password history and password validity period.
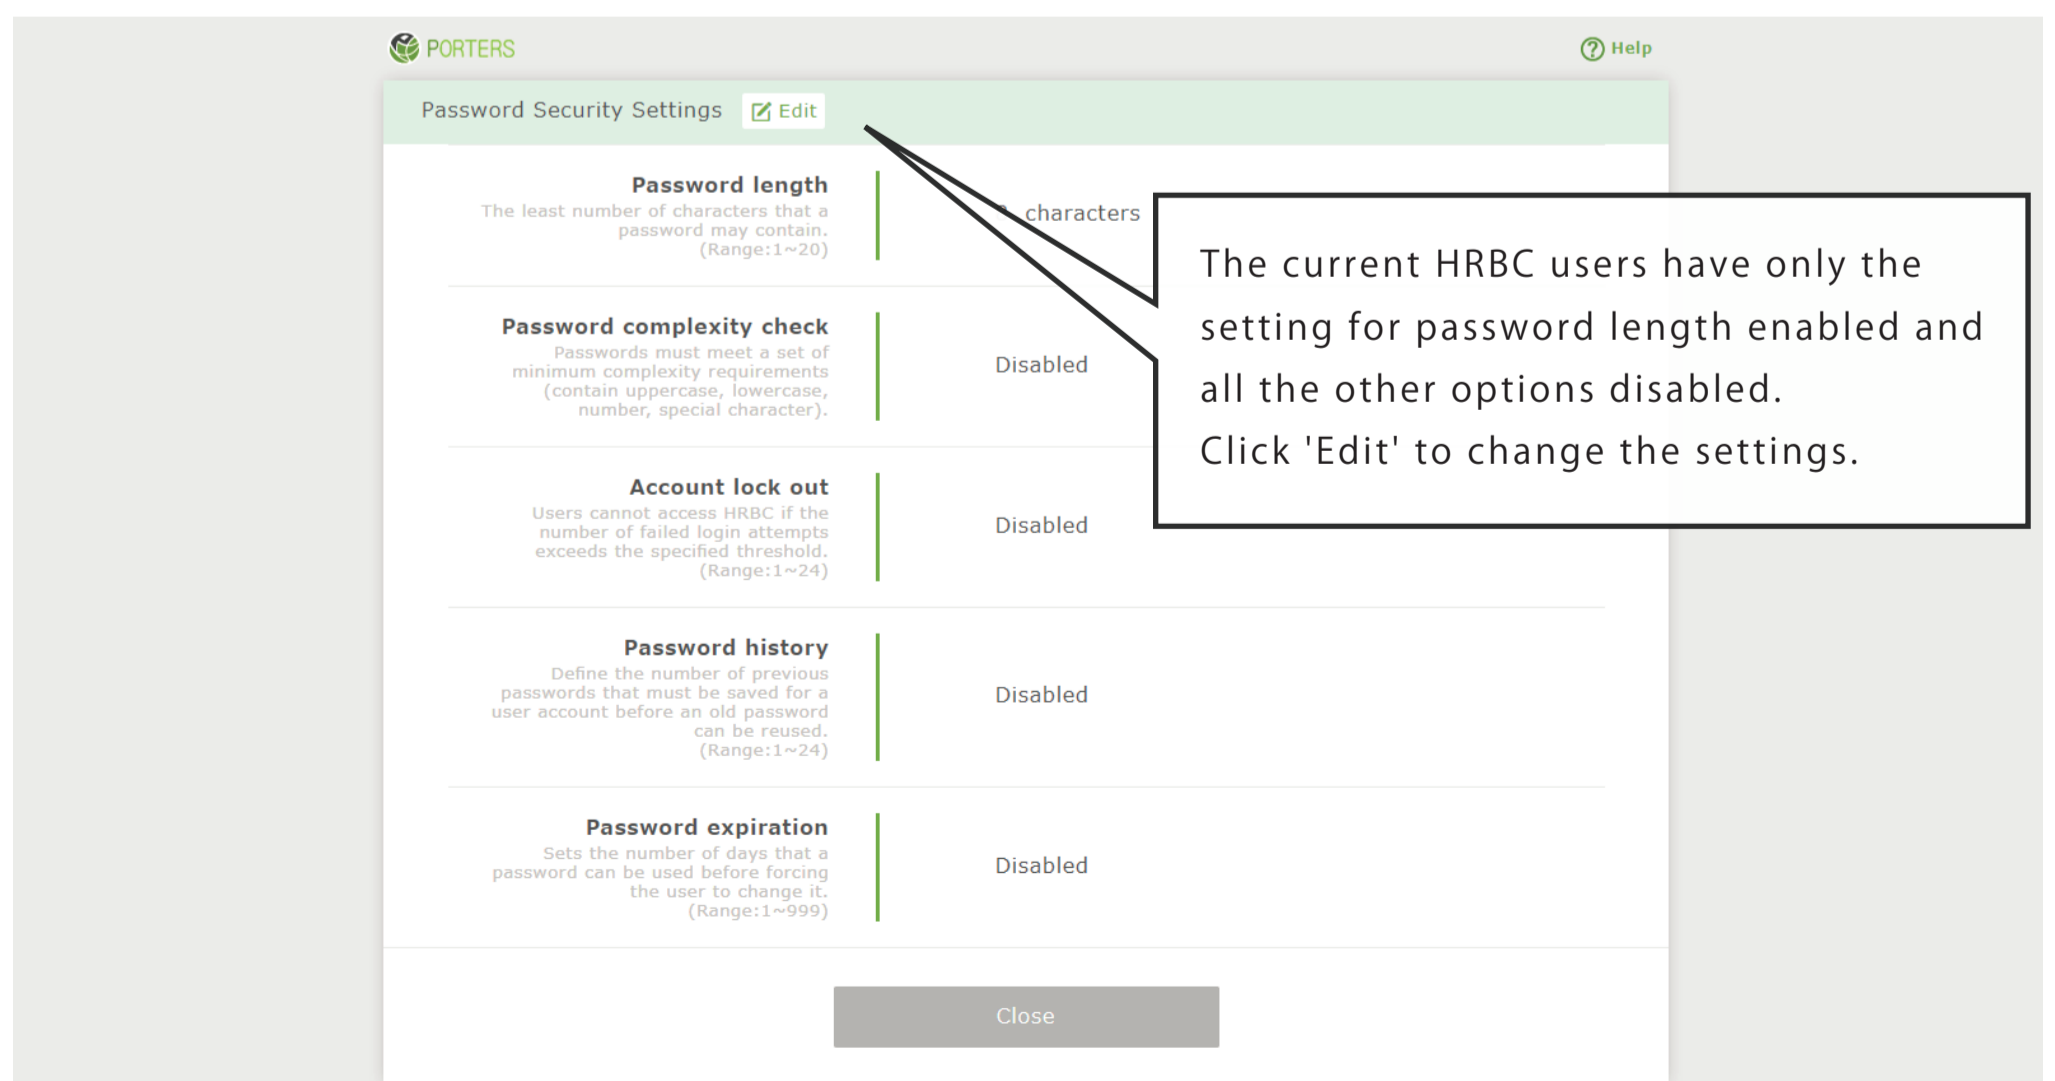

※As long as HRBC users do not change security settings for password after the January 16th 2018 release, the old settings will be applied.

🌿 PORTERS   ❓ Help

Password Security Settings   ✏ Edit

Password length
The least number of characters that a
password may contain.
(Range:1~20)   characters

Password complexity check
Passwords must meet a set of
minimum complexity requirements
(contain uppercase, lowercase,
number, special character).   Disabled

Account lock out
Users cannot access HRBC if the
number of failed login attempts
exceeds the specified threshold.
(Range:1~24)   Disabled

Password history
Define the number of previous
passwords that must be saved for a
user account before an old password
can be reused.
(Range:1~24)   Disabled

Password expiration
Sets the number of days that a
password can be used before forcing
the user to change it.
(Range:1~999)   Disabled

Close

The current HRBC users have only the setting for password length enabled and all the other options disabled.
Click 'Edit' to change the settings.

The edit screen for 「Security Settings for password」:

When you click 「Save」, the updated security settings for password will be saved. After the settings are done, at the time of changing password, each standard user will be required to use a password as per the requirements set by the System Administrator and the details of the settings will be displayed.
※If the standard users do not change their passwords, they can continue to log in using the current password.
