3. New navigation UI in detail view

Improve the navigation inside the detail view. The user can navigate through the detail view by clicking the anchor button on the left side of the detail view.

Improve the navigation between the general info and the sublists in the detail view.

The user can uses the left side anchor menu, to jump and check the sublist of his choice.

In a few clicks the user can edit sublists.

4. Hide / show page number in document edition

Page number option has been added in the document editor UI. (resource action menu > document). The user can now choose to show or hide the page number.

				Horey 5000 characters	

6. Other bug fixed in this version

- Some time values were incorrect due to the time-zone differences. For countries using summer time, the system was was returning wrong value.
- Could not use "add new record" from a resource that had "unused items" (unused items can be set in customization page)
